SOLID-X URETHANE CEMENT HB

HIGH BUILD 100% SOLIDS CEMENTITIOUS URETHANE SYSTEM

Versatile's 1007 Solid-X Urethane Cement High-Build (HB) is a seamless 1/4-inch 100% solids cementitious urethane system that provides a tough, high-build underlayment. It features a low odor, no VOC formulation that is resistant to most chemicals. The Solid-X Urethane Cement HB product is a combination of 100% urethane blended with proprietary aggregates. It is applied at 3/16-inch and broadcast with clear quartz resulting in 1/4-inch total thickness. This product offers very good workability and gives extended working times to make installation easier.

This system is most suitable for commercial and industrial environments requiring durability and thermal shock resistance. 1007 Solid-X Urethane Cement HB makes floors abrasion and impact-resistant, and an anti-slip additive can be added to bolster safety requirements. The product comes in five finishes, and any of our quartz or flake products can be used with it. A polyaspartic topcoat can be used for added durability, UV protection, and superior coating longevity. Solid color systems can use a pigmented polyaspartic topcoat for added color fastness.

FEATURES & ADVANTAGES

- 100% Solids
- Zero VOC
- Low Odor
- High-Build
- Self-Leveling
- Withstands 15 lbs of Moisture Vapor Emissions (MVE)
- Skid Resistant
- Thermal Shock Resistant
- Chemical Resistant
- Impact Resistant
- Abrasion Resistant
- Available in 5 Colors
