4900 CRACK-WELD

100% SOLIDS EPOXY CRACK REPAIR

4900-R Crack-Weld is our original two-component 100% solids epoxy designed for bonding concrete back together within cracks, creating an ultra-strong adhesion. The ultra-low odor of the system and the solvent-free nature allows it to be applied without disabling surrounding operations during application and cure.

4900 5 Minute Crack-Weld is a two-component 100% solids epoxy designed for bonding concrete back together within minutes. The ultra-low odor of the system and the solvent-free nature allows it to be applied without disabling surrounding operations during application and cure. This product is a must-have for installers who require a quicker turnaround time.
